

# Current and Future Trends in Technology

Raphael Lopez

Sep. 9, 2022

# OUTLINE

- ▶ Executive Summary
- ▶ Introduction
- ▶ Methodology
- ▶ Results
  - ▶ Visualization – Charts
  - ▶ Dashboard
- ▶ Discussion
  - ▶ Findings & Implications
- ▶ Conclusion
- ▶ Appendix

# EXECUTIVE SUMMARY

- ▶ Current Technology Usage
  - ▶ Top 10 Languages Worked With
  - ▶ Top 10 Databases Worked With
  - ▶ Popular Platforms
  - ▶ Top 10 Web Frames Worked With
- ▶ Future Technology Trend
  - ▶ Top 10 Languages Desired Next Year
  - ▶ Top 10 Databases Desired Next Year
  - ▶ Popular Platforms Desired Next Year
  - ▶ Top 10 Web Frames Desired Next Year
- ▶ Demographics
  - ▶ Respondents by Gender
  - ▶ Respondents by Country
  - ▶ Respondents by Age
  - ▶ Respondents by Gender Classified by Education Level

# INTRODUCTION

- Analysis of current and future trends relating to programming languages and database management systems (DBMS).
- What are the currently popular programming languages and database management systems?
- Which programming languages and database management systems are more likely to be more popular in the near future?
- A short look into the Demographics in the fields linked to programming languages and database management systems.

# METHODOLOGY

## ► Gathering Data

- Relevant data was gathered using a mixture of API, Python library “requests”, and surveys from publicly available data.

## • Data Cleaning

- Removed duplicates, Found missing values then inputted proper data, then normalized the dataset using python libraries called pandas and NumPy.

## • Analysis

- Analyzed the dataset by looking at Data distribution, Outliers, and Correlations.

## • Data Visualization

- Visualized the analyzed dataset using Cognos Dashboard.

# RESULTS

# PROGRAMMING LANGUAGE TRENDS

## Current Year

### Top 10 Language Worked With

# PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

## Findings

- ▶ JavaScript is the most popular language, Followed by HTML/CSS, and SQL.
- ▶ Java, C# and Bash/Shell/PowerShell currently have some demand.
- ▶ Python and TypeScript are gaining popularity and might surpass the top languages in the future.

## Implications

- ▶ JavaScript and HTML/CSS and SQL have high demand in the future. It would be wise to learn these.
- ▶ Java, C# and BASH/Shell/PowerShell preferences are declining.
- ▶ Python and TypeScript will probably be very popular in the near future. It would be highly advisable to focus on these languages.

# DATABASE TRENDS

# DATABASE TRENDS - FINDINGS & IMPLICATIONS

## Findings

- ▶ Currently MySQL is the most popular database.
- ▶ The top 3 most popular languages desired are PostgreSQL, MongoDB, and Redis.
- ▶ Microsoft SQL Server and SQLite is currently very popular but will be overtaken in the near future.

## Implications

- ▶ My SQL is still and will probably continue to be relevant in the near future.
- ▶ It would be highly advisable to learn PostgreSQL, MongoDB, and Redis as they are likely to take over the top spot for databases.
- ▶ Based on the trends, Microsoft SQL Server and SQLite will probably be on the lower list of popular databases in the future.

# DISCUSSION

By taking a deep look into the data gathered it would seem that the trends are going in favor of big data and advanced programming languages.

The study also shows that programming-related fields are highly dominated by males.

# OVERALL FINDINGS & IMPLICATIONS

## Findings

- ▶ In the near future, advanced programming languages are most likely to be dominant.
- ▶ Big Data and Non-Relational Database Management System is on the up trend.

## Implications

- ▶ In the near future, it would be harder to find employees that are using currently popular programming languages and Database Management Systems.

# CONCLUSION

- ▶ The current tech-related fields are dominated by younger males mostly based in the United States.
- ▶ As time goes by the trend is heading in favor of advanced programming languages and non-relational database management systems.
- ▶ If companies disregard the trend it might make it harder for them to find staff with knowledge of currently popular programming languages and database management systems in the near future.
